DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is misdescriptive and rendered the claim indefinite. Claim 1 recites voltage regulator with an output transistor (MP1) in line 1 and further recites a first PMOS FET in line 2. It is seen that the output transistor and the first PMOS FET are two different transistors.

However, according the drawings the transistors are the same.

Claims 2-12 are rejected as including the indefinites of claim 1.

Allowable Subject Matter

3. Claims 1-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 1-12 would be allowable because the prior art fails to teach or suggest the combination of transistors MP2, MP3 and resistor R3 connected as claimed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references are cited as interest because they show some circuits analogous to the claimed invention.
